Local hospital networks and National Health Reform

A local hospital network (LHN) is an organisation that provides public hospital services in accordance with the Agreement. An LHN can contain one or more hospitals, and is usually defined as a business group, geographical area or community. Every Australian public hospital is part of an LHN.

Note: The term 'local hospital network' is a national term. Some states and territories use their own terminology to describe these networks, such as local health districts, health organisations, and hospital and health services.

Under the Agreement, LHNs receive funding for the following public hospital services:

- All admitted and non-admitted services
- All emergency department services provided by a recognised emergency department
- Other outpatient, mental health, sub-acute services and other services that could reasonably be considered a public hospital service.

Note: LHNs also receive funding from other sources, including the Commonwealth, states and territories, and third parties for the provision of other specific functions and services outside the scope of the Agreement, for example dental services, primary care, home and community care, residential aged care and pharmaceuticals. For further information on total funding to a particular LHN, contact the NT Department of Health to view the service agreement for that LHN.

Basis for National Health Reform payments – Northern Territory, May 2016

For the basis of the Commonwealth contribution to NHR funding, see [Basis of Commonwealth NHR funding, 2015-16](#).

The basis used to determine NHR payments to LHNs in the Northern Territory for May 2016 was advised by the NT Department of Health to be as follows:

The annual funding allocation for the Top End and Central Australian Health and Hospital Services of Northern Territory is determined on a historical basis for both the activity based funding (ABF) and block service streams, supplemented by a level of growth based on Northern Territory Government Wage and Consumer Price Index parameters. Projected activity increases are not budgeted for and both local hospital networks are required to meet demand increases from within existing budgets supplemented by National Health Reform Agreement efficient growth payments.

Variations to monthly payments to the Northern Territory LHNs are made based on cash requirements. Cash requirements are impacted by the Northern Territory Salary payment cycle and other monthly variations, such as contractual obligation payment cycles which the LHNs are engaged in.

Reference information

The financial information outlined in the following report is categorised as:

- *NHR funding* – when the Commonwealth or state or territory government pays NHR funding into a state pool account or state managed fund.
- *NHR payments* – when NHR funding that has been deposited into a state pool account or state managed fund is paid out of the state pool account by the Administrator, or is paid out of the state managed fund by the state or territory.

Commonwealth Block funding represents Non-admitted Mental health, Small rural hospitals, Teaching, training & research, and Other non-admitted categories, which are funded by the Commonwealth and paid to the state managed fund.

Commonwealth Other funding represents other amounts funded by the Commonwealth, transacted through the state pool account and subsequently paid to state or territory health departments. This currently represents the Commonwealth contribution to public health.

NT funding represents funding contributions paid by the Northern Territory into its own state pool account, and subsequently paid to LHNs within the state, to the Northern Territory health department and/or to other state pool accounts.

Other state/territory funding represents contributions paid to Northern Territory by other states and territories for cross-border activity.

Note: The grey shaded areas in these tables reflect cells that are not applicable for a particular 'paid out' column. For example, Commonwealth block funding is only paid to state managed funds and not to local hospital networks or state or territory health departments.

NHR funding and payments shown in these tables include GST where applicable. For more information, see [National Health Reform funding and payments](#).

NHR contributions by local hospital network

Table 4a – NHR contributions by local hospital network – Northern Territory, May 2016

This table shows NHR contributions (from state, territory and Commonwealth sources) made to each LHN in the Northern Territory during May 2016.

NHR contributions to LHNs are separated into an activity-based funding (ABF) component and a block component.

Local hospital network	ABF component (ex GST) (\$)	Block component (ex GST) (\$)	Total NHR payments (ex GST) (\$)
Central Australia Health Service	18,285,685	9,471,605	27,757,289
Top End Health Service	26,767,510	29,235,987	56,003,496

See explanatory notes below table 4b.

Table 4b – NHR contributions by local hospital network YTD – Northern Territory, May 2016

This table shows YTD NHR contributions (from state, territory and Commonwealth sources) made to each LHN in the Northern Territory as at May 2016.

NHR contributions to LHNs are separated into an activity-based funding (ABF) component and a block component.

Local hospital network	ABF component YTD (ex GST) (\$)	Block component YTD (ex GST) (\$)	Total NHR payments YTD (ex GST) (\$)
Central Australia Health Service	166,820,015	106,604,696	273,424,711
Top End Health Service	267,691,580	318,258,809	585,950,389
Total	434,511,595	424,863,505	859,375,100

NHR contributions in this table are GST exclusive to enable comparability of NHR payments in each LHN report.

Note: This table excludes GST. The majority of government funding to LHNs is not subject to GST. However in some cases hospital funding to non-government entities does attract GST, for example, denominational hospitals, privately and commercially owned health facilities, or any other non-government third party provider of health services or related supplies.

Estimated monthly, YTD and annual activity

States and territories provide service volume *estimates* at the start of each financial year, and if required, can continue to refine these estimates during the course of the year. These *estimates* form the basis of monthly reporting of service volumes until *actual* service numbers become available. These estimates are expressed as National Weighted Activity Units (NWAU).

States and territories provide estimated annual NWAU to the Administrator as a basis for determining the Commonwealth activity-based funding. Current month NWAU estimates accumulate through the year-to-date (YTD) NWAU, to be equal to the annual NWAU at the end of the financial year.

States and territories may also provide activity information relating to the delivery of other public hospital functions funded.

Table 5 – Estimated monthly, YTD and annual NWAU by local hospital network – Northern Territory, May 2016

This table shows estimated state or territory hospital activity for activity-based funding services expressed as NWAU for May 2016, the associated cumulative year-to-date (YTD), and total estimated annual NWAU for each LHN in the Northern Territory.

Local hospital network	Estimated NWAU delivered in current month	Estimated NWAU delivered YTD	Estimated annual NWAU 2015-16
Central Australia Health Service	3,918	38,087	43,242
Top End Health Service	6,768	71,603	77,475
Total	10,686	109,690	120,717

An NWAU is a measure of health service activity expressed as a common unit. It provides a way of comparing and valuing each public hospital service, whether they are admissions, emergency department presentations or outpatient episodes, by weighting them for their clinical complexity. The average hospital service is worth one NWAU – the most intensive and expensive activities are worth multiple NWAU, the simplest and least expensive are worth fractions of an NWAU.

Monthly NHR payments relate to the cash needs of public hospitals and do not necessarily reflect the volume of services to be delivered in the month.

For more information on the NWAU calculation, see [Calculation of NWAU](#).
